The Full Breakdown of All 450 Builds, Badge Paths, and Play Styles

We broke down every possibility, and the numbers speak for themselves. Across the four play styles there are **450 distinct builds to earn. Civilian** leads the way with 149 different builds, **Illegal Civilian** pushes even further with 166, **Government** sits at 98, and **Faction Roleplayer** keeps it tight and focused with 37. Every one of them comes with its own identity, its own description, and its own path through the badge and tier system.

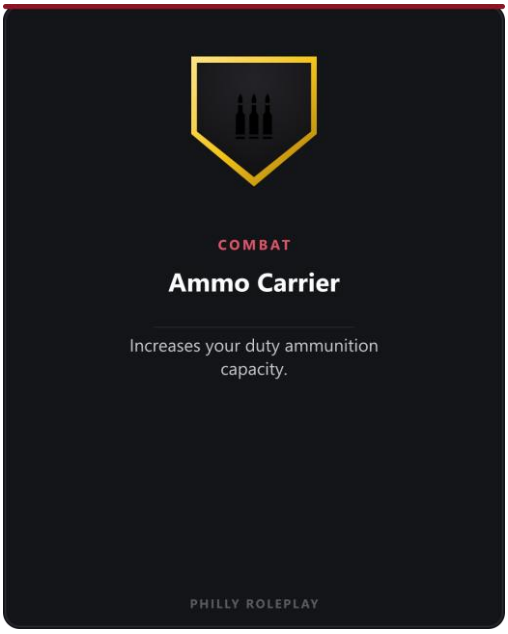

This is the kind of depth you expect from a full release, not a server. Philly Roleplay is basically a new game built inside FiveM, and this breakdown is your map to all of it.

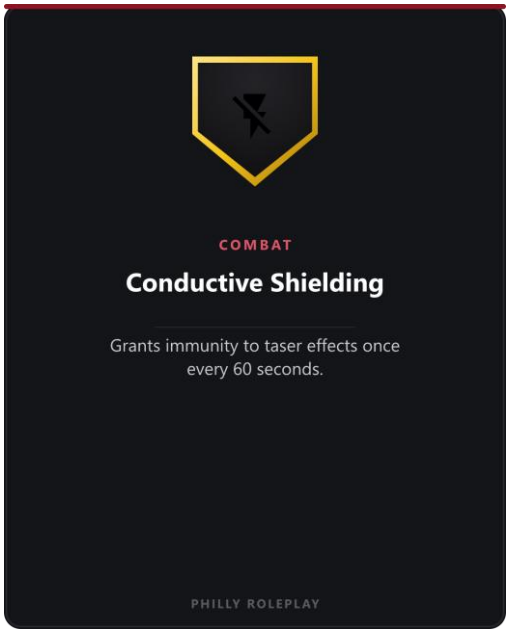

Welcome to Philly Roleplay.

Badge Paths

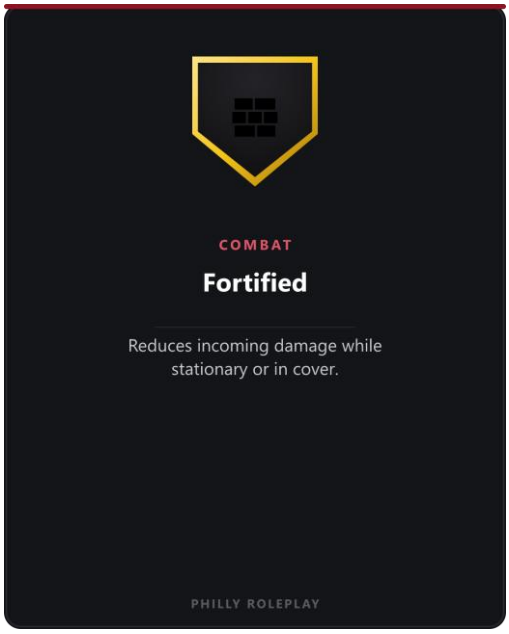

Every badge in the city, grouped by category. Each badge unlocks an exclusive ability, a quality-of-life perk, or a tactical advantage, and climbs the Bronze to Legend tiers as your character grows.
